WORK EXPERIENCE

Vancouver Island Real Estate Board

Nanaimo, BC

IT Business Analyst

Dec 2024-Present

- **Drove selection of a new Association Management System (AMS)** by translating research from 16 stakeholders into requirements, evaluating 8 vendors, and shortlisting 4 for RFPs and demos.
- **Managed the end-to-end implementation of an AI chatbot**, defining requirements, validating responses, and structuring knowledge across staff, 1,100+ members, and public users to improve accuracy and relevance.
- **Owned Agile product delivery for member-facing platforms (MLS, AMS, member portals)**, translating user feedback into requirements and user stories, managing the backlog, and prioritizing enhancements across teams.
- **Partnered with cross-functional teams to deliver data and reporting products**, translating business needs into Tableau solutions and dashboards supporting finance, education, listings, and 1,100+ members.
- **Chaired data governance initiatives**, establishing policies for secure and scalable data access while balancing compliance, usability, and business needs.
- **Reduced organizational phishing risk by 44%** by leading cybersecurity awareness initiatives, including training modules and phishing simulations, strengthening overall data security practices.

Application Developer

Feb 2023-Dec 2024

- **Increased website traffic by 51% and user engagement by 30% in four months** by redesigning and launching a client-facing website using user-centered design principles, Figma, and WordPress.
- **Increased member portal engagement by 68%** by analyzing user behaviour and translating insights into UX improvements, including navigation, feature discovery, and interface design.
- **Partnered with cross-functional teams to implement Single Sign-On for 1,100+ members**, improving platform security and creating a more seamless member experience.

Snack

Vancouver, BC

Software Developer Intern

May 2021-Aug 2022

- **Drove user acquisition by 13% and organic signups by 15%** by launching three interfaces using Go and JavaScript.
- **Improved internal moderation efficiency by 24%** by developing features that streamlined operational workflows and reduced manual reporting effort.
- **Increased user acquisition by 8%** by redesigning user onboarding and introducing profile sharing and video matching.

PERSONAL PROJECTS

Grace - Nautical Crime Investigation Services

- **Led product discovery for an AI-powered maritime risk assessment platform**, translating user research and competitive analysis into functional and usability requirements.
- **Designed and conducted usability testing and interviews** across competing MDA platforms, combining qualitative insights with task-performance data to identify product gaps and opportunities.
- **Translated research findings into low-fidelity prototypes**, exploring new approaches to search, filtering, suspicious-activity detection, and information visualization.
